DETAILED ACTION

The following election requirement is being made in response to the applicant's submission filed 7/3/2006. In particular page 11 states that the applicant feels that the examiner's withdrawal of claims 15-17, 26, 27, 29 and 32-40 in the previous Office Action was improper since the applicant was not given an opportunity to elect any of the multitude of species that those claims are drawn to. That is to say that the species present in the claims but not shown in the drawings were not included in the original election requirement.

Election/Restrictions

This application contains claims directed to the following patentably distinct species:

Species I – the cat embodiment of the invention as shown in Figs. 1-5

Species II – the dog embodiment of the invention as shown in Figs. 6-10

Species III – the embodiment of the fictional character of claim 16 (not shown)

Species IV – embodiment of the TV character of claim 17 (not shown)

Species V – embodiment of the sound chip cover claim 26 (not shown)

Species VI – embodiment of the illumination device cover of claim 27 (not shown)

Applicant should note that if a species is elected that is not shown in the drawings, the drawings must be amended to show the claimed species without the addition of new matter and at least one claim must be presented that is not drawn to any non-elected species. In fact, any claim limitation, elected or not, must be shown in the drawings.

The species are directed to related products, which are distinct since they are mutually exclusive such that they do not overlap in scope; are not obvious variants of one another; and each have a materially different design. See MPEP 806.05(j).

Art Unit: 3679

Applicant is required under 35 U.S.C. 121 to elect a single disclosed species for prosecution on the merits to which the claims shall be restricted if no generic claim is finally held to be allowable. Currently, no claims are generic. Note that claim 1 as newly amended appears to be drawn to species II only

Applicant is advised that a reply to this requirement must include an identification of the species that is elected consonant with this requirement, and a listing of all claims readable thereon, including any claims subsequently added. An argument that a claim is allowable or that all claims are generic is considered nonresponsive unless accompanied by an election.

Upon the allowance of a generic claim, applicant will be entitled to consideration of claims to additional species which depend from or otherwise require all the limitations of an allowable generic claim as provided by 37 CFR 1.141. If claims are added after the election, applicant must indicate which are readable upon the elected species. MPEP § 809.02(a).

A telephone call was made to James R. Sweeney on 9/5/2006 to request an oral election to the above restriction requirement, but did not result in an election being made.

Applicant is advised that the reply to this requirement to be complete must include (i) an election of a species or invention to be examined even though the requirement be traversed (37 CFR 1.143) and (ii) identification of the claims encompassing the elected invention.

The election of an invention or species may be made with or without traverse. To reserve a right to petition, the election must be made with traverse. If the reply does not distinctly and specifically point out supposed errors in the restriction requirement, the election shall be treated as an election without traverse.

Art Unit: 3679

Should applicant traverse on the ground that the inventions or species are not patentably distinct, applicant should submit evidence or identify such evidence now of record showing the inventions or species to be obvious variants or clearly admit on the record that this is the case. In either instance, if the examiner finds one of the inventions unpatentable over the prior art, the evidence or admission may be used in a rejection under 35 U.S.C.103(a) of the other invention.

Applicant is reminded that upon the cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 CFR 1.48(b) if one or more of the currently named inventors is no longer an inventor of at least one claim remaining in the application. Any amendment of inventorship must be accompanied by a request under 37 CFR 1.48(b) and by the fee required under 37 CFR 1.17(i).
